ThermPrint™

Thermal profiling for Data Centers

ThermPrint™ provides a "thermal fingerprint" of your entire data center empowering you to make informed decisions effecting energy efficiency, productivity and uptime.

How ThermPrint™ works:

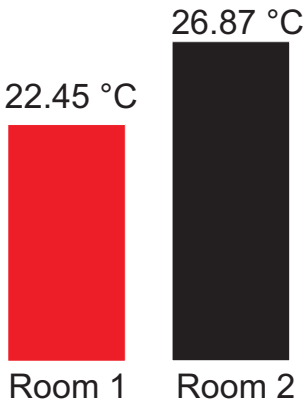
Step 1:

Our technician visits your data center to take high resolution infrared images of rack inlets.

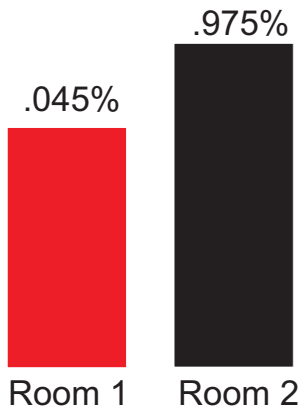
Step 2:

Using proprietary software, millions of temperature measurements are processed into the most comprehensive data center thermal report available today!

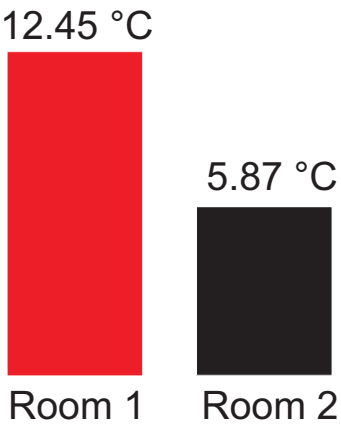
Average Temperature at Rack Inlets:



Hot Spots: % of Rack Inlet Area > °30:



Temperature Spread at Rack Inlets:



Temperature Distribution at Rack Inlets:
